

William Greulich, owner of Kensington Consulting, is a recognized expert in the fields of risk management and regulatory compliance. His background includes leadership roles in pharmaceutical manufacturing, city government and senior consulting support to major public and private organizations world wide.

Summary

Mr. Greulich has over 30 years of experience in environmental, health, safety and security management. Bill began his professional career in a defense industry material science laboratory. In this role he performed Department of Defense (DoD) witnessed testing to military specifications and supervised maintenance of chemical processing equipment. Bill then joined the H. C. Starck industrial chemicals division of Bayer Corporation where he developed and implemented safe equipment and processes in the extremely challenging high temperature, corrosive conditions necessary to produce specialty electronic materials. He transferred to the Berkeley Bayer Biotechnology facility in 1995 where he continued his work in process safety engineering. During this time, he was responsible for all aspects of the PSM and RMP programs for the site anhydrous ammonia process. Bill advanced within the EHS&S role and after a 15-year career left Bayer as Manager of Environment Health Safety and Security (EHS&S) of their world biotechnology headquarters. Bill then joined the City of Berkeley, California as Manager of the Office of Emergency Services, a division of the Berkeley Fire Department. There he was responsible for emergency program development and project implementation for this globally recognized City of more than 100,000 people. In 2005, he began consulting. As principal consultant Bill now focuses on providing technically sound life and property protection expertise to his clients. His projects range from auditing PSM implementation for large organizations through detailed hazard evaluations and Code opinions for sophisticated manufacturing operations.

Fields of Competence

- OSHA Process Safety Management (PSM) compliance
- EPA Risk Management Program (RMP) compliance
- California Accidental Release Prevention Program (Cal-ARP) compliance
- Hazard evaluation and quantitative risk assessment in process industries
- Toxic gas (especially ammonia) release (dispersion) analysis

Certificates

- University of California, Berkeley; Hazardous Materials Management.
- American Institute of Chemical Engineers , CCPS; Process Safety Professional.

Education

- Northeastern University, Boston MA; BS Mechanical Engineering.

Professional Affiliations

- International Institute of Ammonia Refrigeration (IIAR), current Research Committee Chair
